PROFESSIONAL SUMMARY

ICT graduate and self-driven full-stack developer who builds and deploys real systems for businesses and organisations in the Kenyan market. Experienced across Django, Laravel, React/Next.js and Supabase, with a strong systems side: I run my own Ubuntu server with Docker, Tailscale and Cloudflare Tunnel, and automate workflows with n8n. Projects span agri-tech, microfinance, print services and media. Seeking junior full-stack, systems administration or IT support roles.

WORK EXPERIENCE

Freelance Full-Stack Developer 01/2024 – Present
Self-employed
- Design, build and deploy websites and web applications for small businesses and organisations, from WordPress and HTML/CSS/JS sites to Django, Laravel and React systems.
- Applied SEO practices, improving site traffic by up to 40% for client websites.
- Deliver end-to-end: requirements, development, hosting, domains, deployment and monitoring.
- Produce polished Word documents from handwritten and scanned material, including Swahili, using Node.js; also handle logo and branding design.

ICT Attachee 01/2024 – 03/2024
Unique Cyber Voi
- Resolved 15+ customer tech issues daily, improving turnaround time by 30%.
- Provided system diagnostics, printing solutions and desktop support.
- Built customer relationship management skills in a busy walk-in environment.

ICT Attachee 01/2023 – 03/2023
Qwetu Sacco Voi
- Performed hardware and software troubleshooting for 3 departments.
- Installed LAN setups and carried out regular data backups.
- Supported end-users, improving overall service reliability.

LAN/WAN setup, DNS, TLS/HTTPS, Tailscale, Cloudflare Tunnel, reverse proxy, troubleshooting

Other
Technical support, document processing (Node.js/docx), problem-solving, customer service, Java, C, C++, Visual Basic

Backend & APIs
Django, Laravel (Sanctum), PHP, Python, REST APIs, webhooks

Systems & Infrastructure
Ubuntu Server, Docker & Docker Compose, systemd, Linux CLI, SSH, LVM, Windows

Automation
n8n, webhooks, cron jobs, Telegram and WordPress API workflows

CERTIFICATIONS

ICT Technical Support
Alison Online Courses-Completed

Business Management
Google Skills for Africa-Completed

NYS+Brighter Monday Soft Skills Training
Completed

PROJECTS

HomeLab: Self-Hosted Media & Automation Stack 2025
Ubuntu Server, Docker
- Designed and run a server stack with Jellyfin, PostgreSQL and n8n in Docker Compose, with LVM storage and systemd services.
- Exposed internal services safely using Cloudflare Tunnel (no port forwarding) and secured remote access with Tailscale.
- Troubleshot DNS, TLS and container networking issues; built n8n workflows linking Telegram, AI processing and WordPress publishing.

ShambaCare
Django, PostgreSQL, Cloudinary, Heroku
- Agri-tech platform for farmers in Taita Taveta with AI crop disease diagnostics (Google Generative AI), weather information, agrovet locator and farmer dashboard.
- PWA with Swahili language switching, Cloudflare custom domain, and monitoring via Sentry, PostHog and BetterStack.

Charmike Investments Loan System
Supabase, JavaScript, Laravel 12, Sanctum, PostgreSQL
- Microfinance system covering multi-role access, client intake with guarantors, PDF facility agreements and payment tracking.
- Building a Laravel 12 REST API with agents, referrals and payments; planned M-Pesa Daraja, KCB Buni and Africa's Talking SMS integrations.

MaxTech Prints Website
Next.js, TypeScript, Tailwind CSS, Supabase
Business website with an admin interface for product, image and hero-banner management, Supabase storage, and a clear split between public and administrative functions.

Print Shop Management System
Laravel 12, React 19, TypeScript
Full-stack system for jobs, quotations, invoices, payments, inventory, suppliers and reports.

WhatsApp Bot
Node.js, whatsapp-web.js, Supabase, n8n
Bot with Supabase persistence, n8n webhook integration and reminder scheduling.

Rangile TV Blog Website
Odoo, HTML, JavaScript
Centralised fan engagement and content delivery, increasing blog traffic and viewer retention.

Ajira SaaS Platform
Visual Basic.NET, MySQL, HTML/CSS
Platform connecting casual workers with employers, reducing job search time and improving placement rates.
